

Please tell something about yourself.

=>> Hello there! Assalamu Alaikum This is Raisul Islam Hridoy, and I'm super very much excited to share my passion for web development with you. I am a computer science student at Daffodil International University. My academic journey has provided me with a solid foundation in computer science and programming. I'm proficient in a variety of technologies crucial for MERN-stack development, including but not limited to HTML, CSS, JavaScript, and popular frameworks like React on the front end, and Node.js with Express on the back end. I'm also comfortable working with databases, particularly MongoDB.

Tell us something about your strength.

=>> I'm serious and very dedicated to exploring something. I am also a highly motivated and quick self-learner. I'm too judgmental to decide anything. My communication skills and collaboration with team members are good.

Tell us something about your weakness.

=>> My weakness is that I'm sometimes introverted, and I need to take a lot of time to cope with any situation.

Tell us something about your best project.

=>> I dedicated a significant amount of time to hands-on projects to sharpen my skills. One notable project are Smart Pulse Tracker and Skill Fusion hub, which are full-stack web application designed to streamline.

SmartPulse tracker is a full-stack web application designed with responsive.

Users need to login via Google & Github (also can create a new Account).

Admin DashBoard: An Admin can manage user, approve trainer application, show stats, payment history, pay trainers, subscribers view and others authorization power.

User DashBoard: User can see their own dashboard.

Trainer DashBoard: Trainer can see his/her own dashboard and manage slots and his students.

Community/ Newsletter : Anyone can subscribe and give their feedback.

Payment Gateway: Here using stripe payment gateway.

Technology: React.js, Express.js, MongoDB, Firebase Authentication (Recaptcha), Transtack Query, React awesome components, Implement Payment Gateway, JWT Authorization with Token and more.....

What is your vision in this web development field that you want to achieve in next 4-5 years?

=>> I am passionate about staying up-to-date with the latest industry trends and technologies. In fact, here's a time-lapse of me diving into a new technology or language, showcasing my commitment to continuous learning and improvement. Currently, I have learned front-end technologies in future I'll learn about full-stack development.
